Call for Papers

Organizing Committee

Track Name: Sensors

This track aims to gather the physical, chemical and bio sensor community to discuss current issues, ranging from the choice of sensitive materials to sensor manufacturing and their adaptation for the final application such as smart biotechnology, connected cities, environmental monitoring, security,…etc. It is also a forum for discussing the process of data collection by intelligent techniques such as deep learning, multivariate analysis, and others. The track is therefore open to high quality submissions from researchers working in smart sensors, wireless sensing and sensors for the IoT. The topics of this track are detailed below.

- Sensors & IoT
- Sensor systems: signal, processing and interfaces
- Sensor systems & instrumentation for smart transportation & environment
- Sensor systems & instrumentation for health and biology
- Smart industry
- Smart Sensors for Environmental and Medical Applications
- Optical Sensing for Big Data application
- Sensors in an AI Universe
- Smart Wearable and Implantable Sensing Systems
- Sensors for emerging Applications
- Frugal sensors
- Physical & Chemical sensors
- Bio-Inspired Sensors and Systems
- Electronic Tongues
- E-nose for Sensitive and Selective Chemical Sensing Applications

IEEE COINS will publish accepted papers in the conference proceedings and the proceedings will be submitted to the IEEE Xplore Digital library and indexing services.

Selected best contributions of IEEE COINS will be invited to submit expanded versions of their studies to IEEE IoTJ (IF=9.936) for review and potential publication.

Hybrid Event:
(On-site In-person Presentation & Virtual Presentation)

Barcelona, Spain
August 23-25, 2021

IEEE International Conference on Omni-layer Intelligent Systems

Submission of Regular Papers and Special Session Papers
April 30, 2021

Notification of Paper Acceptance
June 30, 2021
